

DANYELLA SANTANA

Data Analyst | Analytics, Reporting & Automation

Dublin, Ireland | +353 874094146 | danycsantana@live.com | LinkedIn: /Danyella-Santana | GitHub: /DanyCSantana

PROFILE

Data Analyst with 7+ years working across customer, commercial and operational data, with hands-on delivery in Power BI, Python, Excel and SQL. Experienced in analysing business and customer data, developing dashboards, and automating repetitive data workflows. Brings experience across different industries and data environments, from large-scale customer analytics to campaign and operational performance, with a focus on producing useful analysis and measurable improvements.

PROFESSIONAL EXPERIENCE

Data & Insights Lead | Musgrave - Elevate

Musgrave's Retail Media and data solution business, connecting FMCG brands with shoppers through retail media and first-party shopper data across SuperValu and Centra.

Nov 2025 – Present | Cork, Ireland

- Lead post-campaign analysis (PCA) and performance reporting for 200+ retail media campaigns across major FMCG brands, including Coca-Cola, PepsiCo/Walkers, McCain and Suntory.
- Use Symphony Data, SQL, Databricks, Power BI and Google Analytics to analyse campaign results, shopper behaviour and category performance across Frozen, Snacks and Soft Drinks, including campaign performance across SuperValu and Centra stores, apps and websites.
- Build campaign benchmarks and measurement frameworks to assess effectiveness, identify opportunities across channels and categories, and support recommendations for future campaigns.
- Analyse shopper behaviour, including product switching and product associations, to identify commercial opportunities across categories and channels.
- Own the workflow from data extraction and analysis through to post-campaign reporting, dashboards and presentation of findings to clients and internal stakeholders.
- Work directly with brand partners and teams across Trading, Brand Activation and Client Solutions, presenting results, contributing to Brand Days and supporting campaign planning and future investment discussions.

Data Analyst – Metadata & Automation | Inflight Dublin

Global provider of inflight entertainment content and wireless IFE solutions, supporting airlines through content, metadata, technical and digital services.

Jul 2022 – Nov 2025 | Dublin, Ireland

- Managed high-volume metadata and media-content data across multiple systems and airline requirements, where accuracy and file completeness were critical to client delivery.
- Built Python and Excel automation for repetitive content and metadata workflows, reducing manual processing by up to 60%.
- Developed a metadata translation database and generator that centralised recurring translation work and reduced translation costs by 40% and processing time by 50%.
- Created tools including filename generators for 8+ systems and 20+ airlines, system update generators and image-processing automation for airline content.
- Built Power BI analysis for the commercial and marketing teams to examine passenger content engagement, including clicks, viewing duration, abandonment, language selection, flight duration and content characteristics.
- Applied data validation, OCR and structured data-cleaning workflows to improve accuracy, while designing tools to be usable by colleagues without a data background.

Marketing Data Analyst | Oi S.A.

Major Brazilian telecommunications company with nationwide operations across broadband, mobile, fixed-line and digital services.

Dec 2017 – Oct 2021 | Rio de Janeiro, Brazil

- Analysed acquisition, retention and customer value across a database of 8M+ customers, producing daily, weekly and monthly KPI reporting and dashboards for commercial and customer operations.

- Monitored churn, retention rate and delta ARPU, using customer segmentation by region, tenure, offer, customer value and other business variables to investigate performance.
- Investigated churn and retention performance by combining sales, customer, campaign and service data to identify drivers of customer loss and opportunities to improve retention.
- Used the findings to support retention initiatives and recommendations to Sales and Marketing.
- Analysed call-centre data to understand reasons for customer contact, including price, offer and service-quality issues, and used the findings to support retention initiatives.
- Built KPI dashboards, ad-hoc analyses and consolidated reports using SAS Enterprise Guide/SQL, Excel and PowerPoint, including analysis of campaign results, retention pilots, portfolio performance and customer opportunities.
